

Act Report

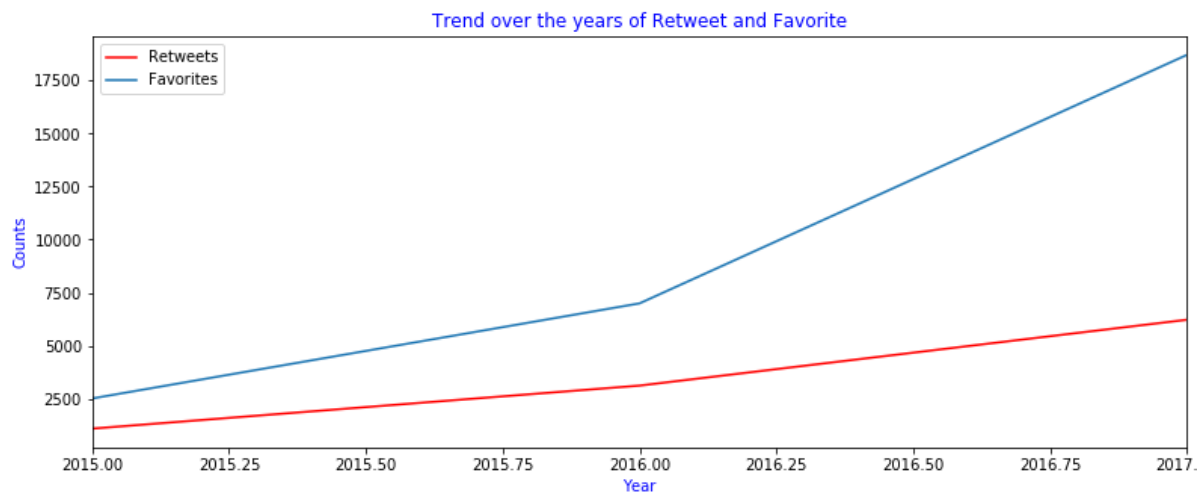

WeRateDogs is a twitter account as a source for professional dog ratings. This account has more than 8.5 million followers and more than 11 thousand tweets. It receives the dogs' pictures and provides rating. The rates almost always above 10.

Twitter Sources

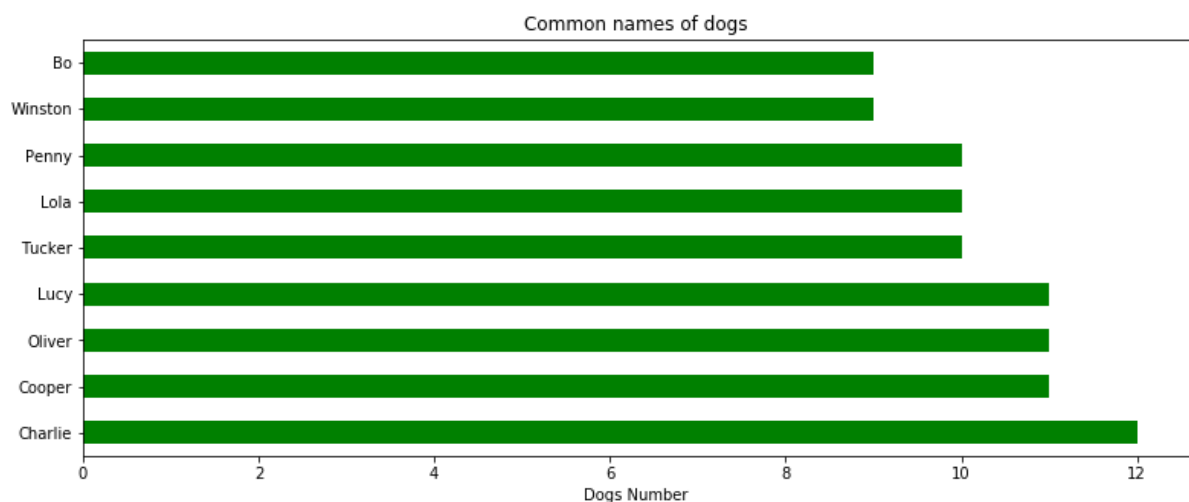

From the above figure I can notice tweets sources were from 4 different sources (iPhone, vine make a scan, web client, tweetDeck). Almost 97% of posted tweets were from iPhone source. From that we can prove that the WeRateDogs used iPhone to tweet.

Trend over the years of Retweet and Favorite

The figure above shows the trend over the years of retweet and favorite of tweets posted by 'WeRateDogs'. The x-axis shows us the year starting from 2015 until 2017. Whereas the y-axis shows us the counts of retweets and favorites. From the figure above we can see the retweets and favorites increase over the year. From 2016, it noticed that the over one year the increasing of favorites become more and more and it counted the most average count at 2017 with more than 17,500 favorites users. From "The dog stages mean retweet and favorite counts" I can notice the huge number of retweets and favorite and I can notice the impact of dog stage and the retweets and favorite.

Common names of dogs

From the figure above is about the common dog names. From that we can notice that the 'Charlie' is the most common name with 12 dogs rate. The "Cooper" "lucy" and "Cliver" are the second most common names of dogs.
